

User Story: Logging In

As a user, I want to be able to log in to the website easily with my Riot Games account. This way, I can quickly and easily ensure that the stats provided are tailored to my account, my performance, and the way I play compared to other users around the same level as me. It would be inconvenient to have to log in through another service and have to go through the process of linking that account to my Riot Games account or the process of creating a new account entirely.
