

User Story 4: Logging in with Spotify

As a user, I want to be able to log in to the website easily with my Spotify account. This way, I can quickly and readily access data that's relevant to me when it comes to the webapp, such as the users that I often search up. It would also allow for information about the music that I listen to on Spotify to be accessible to the webapp to tailor its recommendations. It would be inconvenient to have to log in through another service and have to go through the process of linking that account to my Spotify account, or to have to go through the process of creating a new account entirely.
