<u>User Story: Community Statistics</u>

As a logged in user, I want to be able to search up other players by their game name and ID's and see the statistics of their last 10 matches and see analyses of their performance in those games. Along with this, I would like to see their most played characters and their win loss ratio on those characters. I want to be able to see their current rank and how many matches they have played during this current season. This should all be displayed neatly in 1 page and will likely hold more information.
